

Freestanding Dishwasher From Miele

Hygiene comes first

Why purchase a Miele dishwasher

No-one cleans more hygienically!

Miele sets benchmarks in terms of the performance, the sparing use of resources and the hygiene of your dishwasher. The perfect interplay of all components make dishwashing a particularly hygienic affair. Miele only uses materials which can withstand the considerable strain they are subjected to inside a dishwasher. For this reason the entire inner cabinet is made from high-quality stainless steel. Miele's special dishwashing technology includes three full-size spray arms which not only thoroughly wash the load, but the inner cabinet too. In addition to this, fresh water is used in all water intake cycles throughout the programme.

The Rhein-Waal University of Applied Science in Germany has confirmed the hygienic performance of Miele dishwashers in the ECO programme. The reduction of bacteria on contaminated plates is reduced by more than 99% at the end of the ECO programme. The Miele appliance is "[...] assessed as being faultless from an hygienic point of view [...]".

The Miele Quality

Like all other Miele appliances, Miele dishwashers are an example of Miele's proverbial quality and are tested to last 20 years. This claim is endorsed by our in-house laboratory tests and ultimately over many years in your home.

Duration test

We put our dishwashers through laboratory testing where they're run for 7,500 cycles at 75 degrees, the equivalent of a load a day for more than 20 years.

The basket endurance test

Cutlery trays and dishwasher baskets are heavily loaded: 3 kg in the 3D cutlery tray, 10 kg in the upper basket and 20 kg in the lower basket. Under these extreme loads baskets are automatically pulled and pushed in and out 100,000 times.

Door endurance test

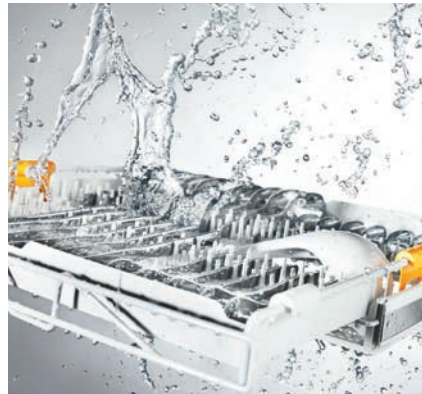

An endurance test simulates the strain which the material is subjected to over the 20 years the machine is designed to last. The dishwasher door is opened and closed automatically 100,000 times, the equivalent of 13 times per day for 20 years.

Highlights

Cutlery tray

Load the cutlery in the tray as shown. Every piece of cutlery has its own separate space and is perfectly cleaned and dried. Items are not scratched and can be removed hygienically, fast and ergonomically. The cutlery tray also gives you more space in the lower basket.

Patented 3D cutlery tray¹

The innovation from the inventor of the cutlery tray: Miele's intelligent 3D cutlery tray can be adjusted in three directions and adapts perfectly to various load arrangements. This allows awkward items such as whisks and soup ladles to be accommodated and gently washed.

Adjusting the side sections of the cutlery tray allows tall stemware to be held securely in the upper basket. No need to remove the side sections from the drawer!

Perfect GlassCare

Perfect GlassCare ensures that the water in your machine has precisely the correct mineral content. This helps protect your glassware and keeps stemware looking as good as new for longer.

AutoSensor

AutoSensor measure the turbidity of the water in wash cycles, to provide perfect results no matter what the load or degree of soiling. In the Sensor wash programme, the degree of turbidity is measured, and the programme cycle is adjusted in order to achieve perfect wash results combined with the lowest possible electricity and water consumption. Temperatures, cycle times and water consumption are adjusted as a factor of the intensity of soiling.

Freshwater dishwashers with water consumption from 6.5L

Miele dishwashers achieve best cleaning results in the Sensor Wash programme with as little as 6.5 L of water. Compared with hand wash, this has reduced water consumption over the past 30 years by 85%! It also means that you can have more time to enjoy the better things in life.

AutoOpen drying

The dishwasher door opens automatically at the end of a programme. Glassware and crockery is perfectly dried and cools down faster. Even plastic items are properly dried. AutoOpen drying curtails programme times and reduces energy consumption significantly.

¹ German patent: DE 10 2008062 761 B3

N.B. Features may vary depending on model.

Height-adjustable upper basket²

On all Miele dishwashers, the upper basket is height-adjustable and can even slope to one side. A total of 9 positions are possible. The space available in the dishwasher can be put to optimum use in each case.

MultiComfort in lower basket

The unique MultiComfort zone allows plates of different sizes (max. 35 cm Ø) to be accommodated in three rows. Cutting boards, serving platters, large bowls and dishes, and tall beer glasses can be accommodated easily. For larger pots and pans and bulky items, the entire lower basket can be rearranged to provide a flush, flat surface.

Triple filter system

A unique triple filter system ensures you get excellent results whilst using water and energy efficiently. The coarse, fine and microfine filters retain any residues to keep the circulating water filtered and clean. The base of the filter is hinged, giving easy access for cleaning, and some models also feature a special LED on the control panel to remind you when to clean the filter.

SoftClose

With SoftClose, Miele offers the best door design on the market. Easy opening and soft closing doors throughout the range can be adjusted to perfectly balance the weight of furniture doors.

Delay start

Thanks to delay start you can set the start time for a programme. The start time can be delayed between 30 minutes and 24 hours. The delay period is shown in 30 minutes increments for a delay period between 30 minutes and 9 hours 30 minutes. It is shown in hours for periods longer than this.

Waterproof anti-leak system

To protect against flooding, all Miele dishwashers feature the Miele Waterproof System. In the event of a leak, a double solenoid valve stops the flow of water directly at the stopcock.

Miele CareCollection

Simply perfect dishwashing with Miele

When selecting your Miele dishwasher, you opted for best quality and performance. To constantly achieve optimum results it is important to use the right detergents, rinse and cleaning aids. For this reason Miele offers detergents specifically designed for Miele dishwashers.

Dishwasher detergent tabs (60 tablets) HK\$ 390

The Miele 3-phase dishwasher detergent tab is individually coated in water-soluble and biodegradable film. The film prevents physical contact with the detergent. Its special formula contains active oxygen that helps to dissolve proteins and starch in low temperature and help remove persistent dried on food soil. Its integrated rinse aid helps crockery dry faster after it has been washed and reduces lime and water stains on crockery.

Dishwasher powder detergent (1.5 kg) HK\$ 180

This special formula of the Miele dishwasher detergent powder contains active oxygen that helps to dissolve proteins and starch in low temperature and help remove persistent dried on food soil. Dispense can be done precisely with the help of an easy pouring spout.

Rinse aid for dishwasher (500 ml) HK\$ 100

Miele rinse aid helps to reduce lime and water stains on the crockery. It supports the drying phase and contains a glass care formula for long-term prevention against etching.

Freshener for dishwasher (4 ml) HK\$ 88

The lime and green tea freshener eliminates unpleasant smells from the dishwasher. The active ingredients include a blend of citrus oils to combat odors. It is used in the top basket and lasts for about 60 wash cycles.

Machine conditioner for dishwasher (250 ml) HK\$ 130

Regular use of this conditioner extends the lifecycle of the machine and ensures that good wash performance is maintained. The special formula also helps to keep door gaskets supple and maintain a tight seal. It is recommended to use one bottle once every 2 months in an empty dishwasher.

Machine cleaner for dishwasher (250 g) HK\$ 150

This special machine cleaner removes soiling through fatty substances and bacteria and deals with the smells they can cause. This product ensures thorough, deep cleaning. Its use guarantees perfect results over the entire life of your appliance.
